EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the specification:

On page 1, line 2 after "1998", please insert - - U.S. Patent No. 6,631,401 B1 - -

2. The following is an examiner's statement of reasons for allowance: The closest prior art of record Hagersten, EP 0 817 073 A2, taught a requesting agent that requests a transaction, a home agent that generates probes, such as coherency demands, and one or more slave agents that receive the probes. The probe responses, i.e. coherency replies, are returned to the request agent and the home agent indiscriminately. Thus, as Applicant argues on pages 2-3 of the response filed on May 22, 2007, Hagersten fails to teach probes that have an indication of the where the probe response should be returned. Hagersten also fails to teach that according to the first or second type of transaction associated with the probe, the probe response is sent to the requesting node or generating node.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
